

⑦

# (Lecture 17) (CSS - Position) Property

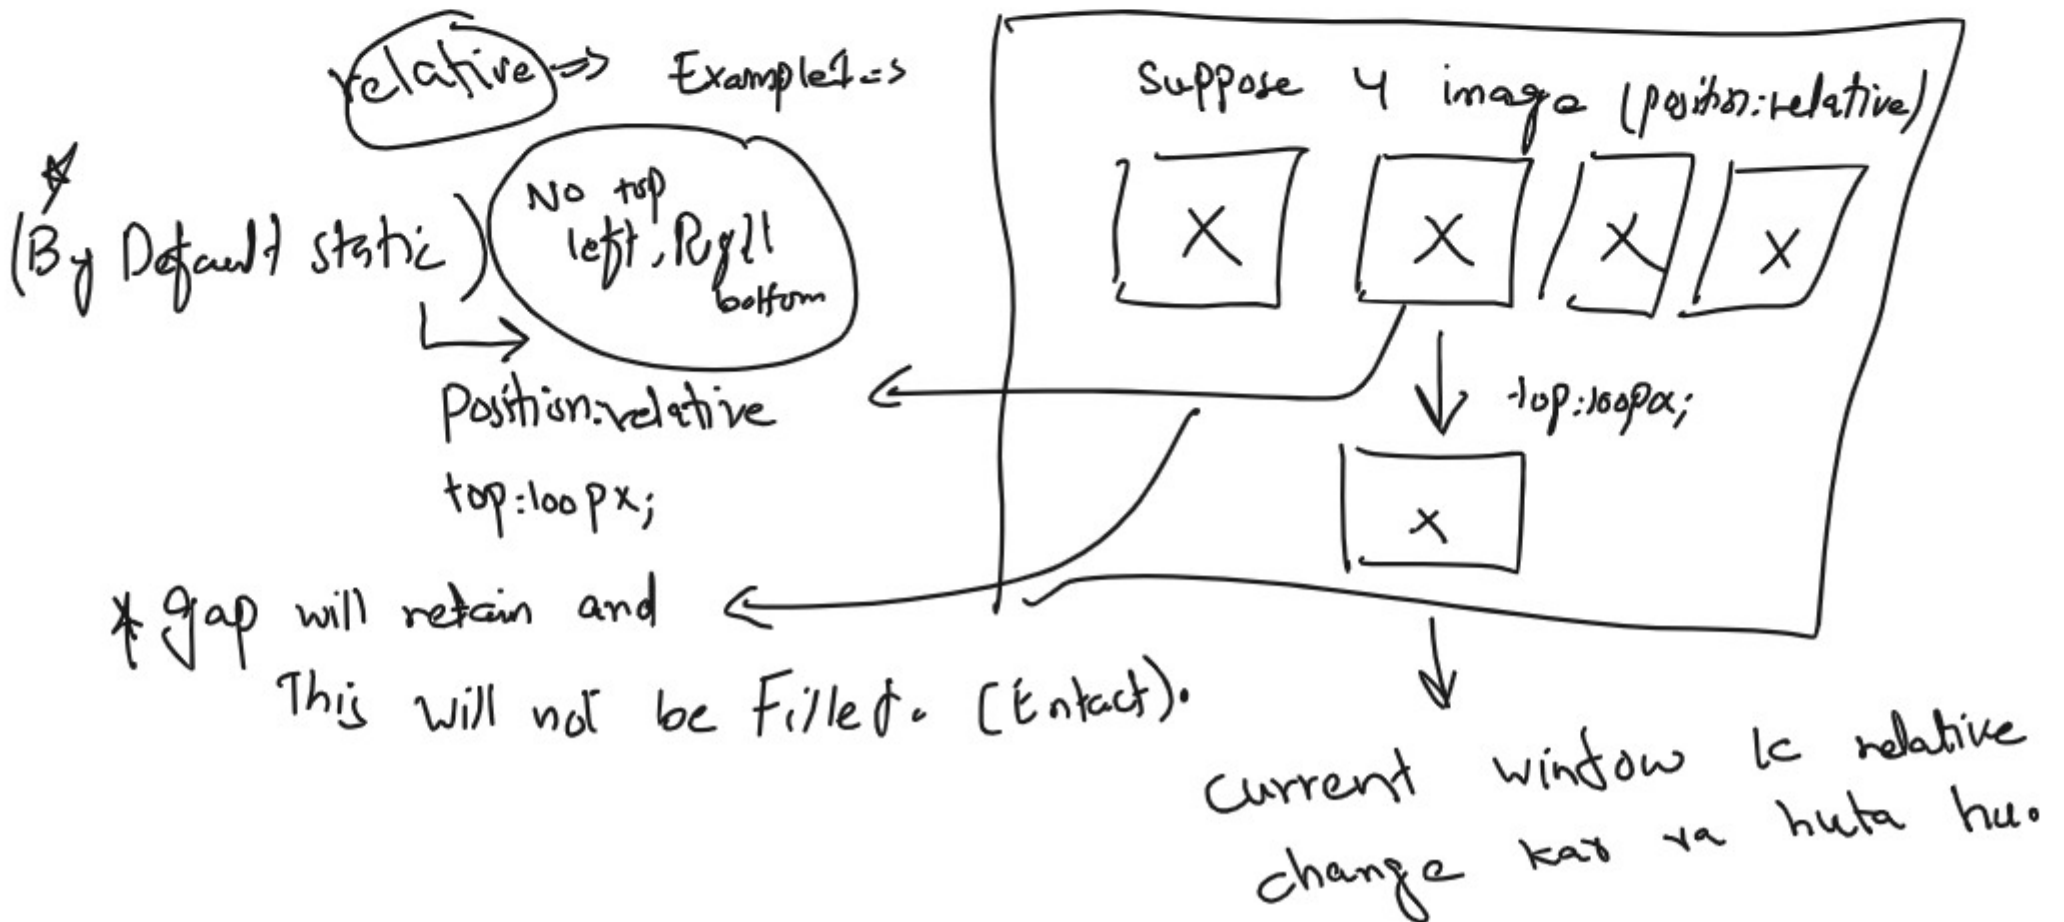

## \* Types of Position Property

(By Default is static)

- ① relative
- ② Absolute
- ③ Fixed
- ④ sticky

How to show the elements on the page?  
(imp)

Q2 How to position the images, texts, elements?

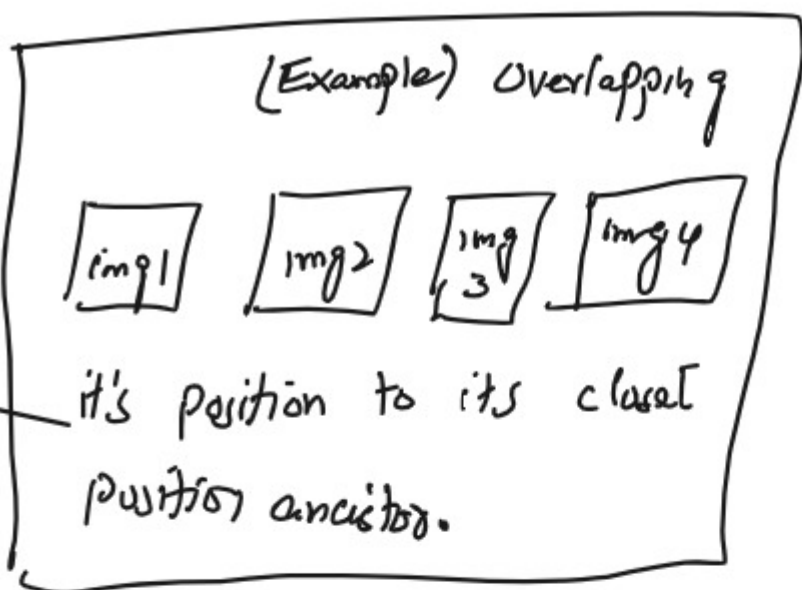

## (2) position Absolute

<div> ← position relative

<img />  
<img />  
</div>

top, left, bottom, Right

position absolute.

③ (Position Fixed) → it will fix the element

Posto for whole window view

④ (Position sticky) → in this property the element will stick for the view port of its parent Div. Suppose.
