

(SEO and Head Tag in html)

inside <head>

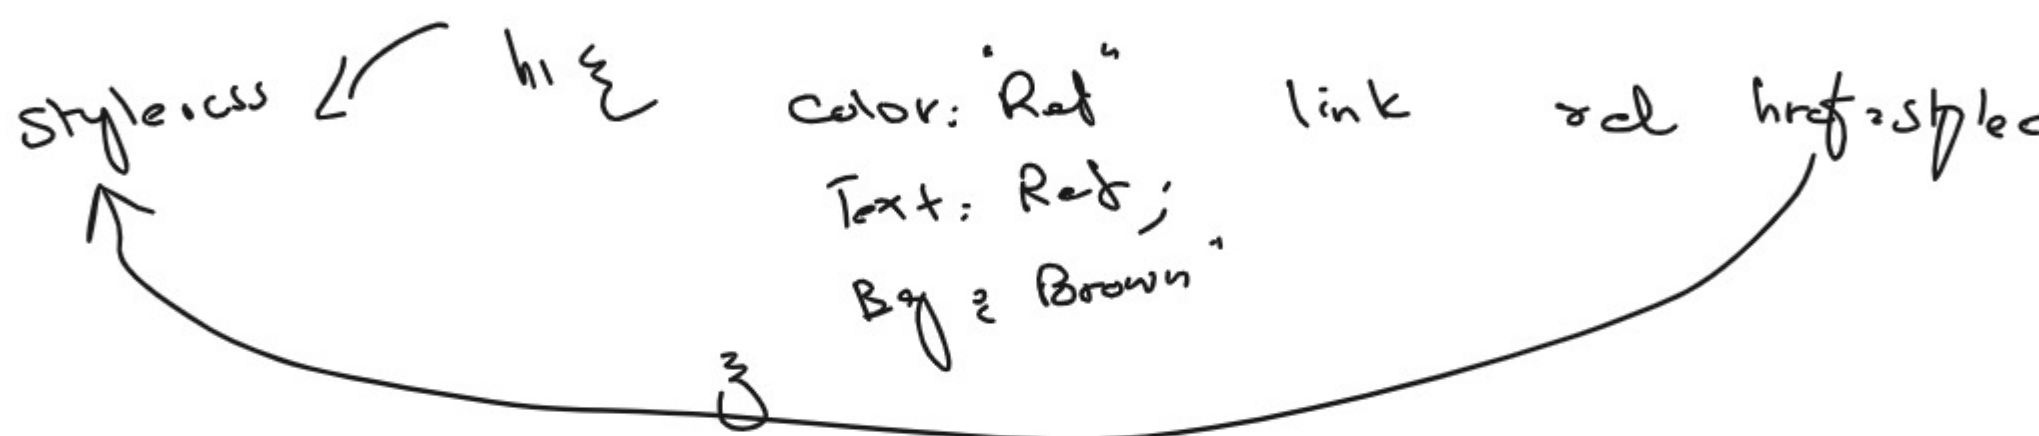

Q = What is head tag?
 A = What is head tag?
 Why only body Data is Visible?

(let Explore Metatags)

(title, charset, utf-8)

- ① title -> reflect on the browser option.
- ② Favicon -> icon -> web logo -> browser logo.
- ③ Stylesheet -> nothing but styling of the Pages.

(lets add javascript code)

link <head>

<script src="name.js">

</head>

(Search Engine optimization)

(let's talk about SEO)

- > to show my website on the top of google.
- > Meta tags play very important role in SEO.

① Meta charset = "utf-8" -> it relate to ASCII
 Every character has some digital value.
 L -> multilingual support.

② meta viewport -> Uniform, stability, and render the latest engine.
 Browser -> Default 100% -> Default Device.

③ Viewport, Content, device width
 L -> zoom scale
